SUMMARY

Frontend Lead with 5+ years of experience in MERN/MEAN stack, building scalable web applications, dashboards, and financial systems. Expert in React, Angular, Node.js with strong skills in performance optimization, API integration, and team leadership.

EXPERIENCE

Frontend Lead – Greenpay Network Pvt. Ltd.

Mar 2024 – Present

- Led full-stack development of real-time financial dashboards, utilizing project management and stakeholder management to collaborate cross-functionally with product and design teams, resulting in 10K+ transactions/day and improving data visibility by 30%.
- Led software development and architectural system design of scalable web applications using JavaScript and React, reducing load time by 25% and mentoring 4+ developers on modern frontend practices.
- Spearheaded critical architectural decision-making processes for frontend infrastructure, evaluating trade-offs in state management and component libraries to optimize system scalability and developer productivity.
- Authored comprehensive technical documentation for frontend architecture and component libraries, streamlining onboarding for new team members and ensuring long-term maintainability of core systems.

Software Developer – Thinkonic Software Pvt. Ltd.

Aug 2023 – Mar 2024

- Developed data-driven dashboards processing large datasets, applying analytical skills to improve analytics performance by 20% using modern frontend technologies.
- Enhanced system scalability by 20% through optimized architecture, robust REST API development, and caching strategies.
- Architected high-availability services by integrating distributed computing principles and optimizing network communication paths to reduce latency in data-heavy applications.

Assistant Software Engineer – Konverge AI

Jun 2021 – Aug 2023

- Built live data dashboards, high-performance frontend modules and visualization tools, improving monitoring efficiency by 30% for analytics systems.
- Developed high-performance UI frontend modules and APIs, applying UI Design and user-centered design principles to improve application responsiveness by 25% and user experience.
- Engineered and maintained internal developer tools that streamlined the debugging process, effectively resolving system issues and improving health visibility for the engineering team.

EDUCATION

Fergusson College

M.Sc. (Computer Application)

Aug 2019 – June 2021

CERTIFICATIONS

Mern Stack Front to Back, Advance React Redux, Javascript Basics for Beginners, Python 3 Programming – Udemy
Problem Solving Basics – Hackerrank

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend/Backend: React, Angular

PROJECTS

FinPay App

- Developed secure B2B financial application by optimizing data storage and security protocols, implementing JWT authentication and encrypted transaction workflows.

MLStream Visualizer

- Created monitoring dashboard with real-time APIs for tracking machine learning performance, leveraging Artificial Intelligence and LLM integration to visualize model metrics.

UrbanData Map

- Developed traffic analytics dashboard delivering actionable insights through data visualization.
