SUMMARY

Frontend Lead with 5+ years of experience in MERN/MEAN stack, building scalable web applications, dashboards, and financial systems. Expert in React, Angular, Node.js with strong skills in performance optimization, API integration, and team leadership.

EXPERIENCE

Frontend Lead – Greenpay Network Pvt. Ltd. Mar 2024 – Present

- Led full-stack development (MERN: MongoDB, Express.js, React.js, Node.js) of real-time financial dashboards, integrating REST APIs and backend development to handle 10K+ transactions/day, improving data visibility by 30%.
- Led architectural design of scalable web applications using React, reducing load time by 25% and mentoring 4+ developers on modern frontend practices.

Software Developer – Thinkonic Software Pvt. Ltd. Aug 2023 – Mar 2024

- Developed data-driven dashboards processing large datasets, achieving a 20% improvement in analytics performance through rigorous performance optimization and modern frontend technologies.
- Enhanced system scalability by 20% through optimized architecture, robust REST API development, and caching strategies.

Assistant Software Engineer – Konverge AI Jun 2021 – Aug 2023

- Built live data dashboards, high-performance frontend modules and visualization tools, improving monitoring efficiency by 30% for analytics systems.
- Developed high-performance UI frontend modules using HTML/CSS and APIs, applying user-centered design principles to advance frontend development standards and improve application responsiveness by 25%.
- Engineered and maintained internal developer tools that streamlined the debugging process and improved system health visibility for the engineering team.
- Managed version control and collaborative workflows using Git to support the engineering team's debugging and deployment processes.

EDUCATION

Fergusson College Aug 2019 – June 2021
M.Sc. (Computer Application)

CERTIFICATIONS

Mern Stack Front to Back, Advance React Redux, Javascript Basics for Beginners, Python 3 Programming – Udemy
Problem Solving Basics – Hackerrank

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend/Backend: React, Angular, Node JS

Low-code Development : Outsystems

PROJECTS

FinPay App

- Developed secure B2B financial application with JWT authentication and encrypted transaction workflows.

MLStream Visualizer

- Created monitoring dashboard with real-time APIs for tracking machine learning performance, including AI/LLM integration to visualize model metrics.

UrbanData Map

- Developed traffic analytics dashboard delivering actionable insights through data visualization.
